## WE PUT AT YOUR DISPOSAL

We offer over **50 years** providing solutions to demanding customers who require very specific characteristics and behaviour according to the sector and their needs.

## WHEREVER YOU GO

We are committed to working closely with our customers, providing them with **exceptional service** and offering an advanced and extensive range of products with very competitive prices.

## HIGH STANDARD OF QUALITY AND SERVICES

We only use materials provided by companies who offer the very **highest quality**, suitable and certified products. Our success is due to top quality assurance: ISO 9001, SGS, UL, TÜV, ISO 14000 and ISO45001.

## CUSTOMIZE TOTALLY YOUR ENCLOSURE

Our production systems can give custom-made solutions **on demand**. Every colour from RAL chart is available to be personalized. A variety of protection standards thanks to our own painting facilities.

**100%**  
*Entirely designed  
and manufactured  
in Europe*

## ELECTRICAL ENCLOSURES SOLUTIONS EMC SERIES DELVALLE

Electromagnetic Compatibility is defined in the EMC Directive as “the ability of equipments to function satisfactorily in a electromagnetic environment without introducing intolerable electromagnetic disturbances to other equipment in the same environment,” and covers two basic principles:

- Not to disturb the other equipment and not to emit disturbances above a given level (this is called “disturbance emission”).
- Not to be disturbed by other equipment with a sufficient level of protection so as not to be disturbed easily (this is called “disturbance immunity”).

Electric, magnetic and electromagnetic fields are everywhere. Also around enclosures and boxes: They are mostly conventional electromagnetic fields such as grid connection lines, signal and control lines, and electrical and electronic modules which radiate electromagnetic fields. Delvalle electrical enclosures gives the protection needed for conventional electromagnetic fields. However, for some intense electromagnetic fields like microwaves, EDM facilities by arc, HF welding technique it is necessary to create a complete screening effect. So we have created our line of EMC solutions Delvalle (enclosures, ventilation, air conditioning and accessories).

### EFFECTIVENESS OF SCREENING IN EMC DELVALLE ENCLOSURES

Delvalle enclosures offer optimum shielding effect to achieve electromagnetic compatibility, both in conventional and strong electromagnetic fields.

FREQUENCY	ELECTRIC FIELD AND PLANE WAVES
200 MHz	78 dB
400 MHz	64 dB
500 MHz	66 dB
600 MHz	67 dB
700 MHz	64 dB
800 MHz	60 dB
900 MHz	58 dB

FREQUENCY	MAGNETIC FIELD	ELECTRIC FIELD
2 MHz	--	66 dB
3 MHz	63 dB	--
10 MHz	80 dB	75 dB
20 MHz	80 dB	69 dB
30 MHz	70 dB	65 dB

FREQUENCY	PLANE WAVES
1 GHz	86 dB
3 GHz	86 dB
5 GHz	80 dB
10 GHz	69 dB
15 GHz	60 dB
18 GHz	50 dB

# ELECTRIC WALL CABINET LUXOR EMC SERIES IP55

Example

**Provides the Necessary Approvals to Guarantee Safety in your Assembly Work**

EMC enclosures with an EPDM conductive gasket between frame and contact surface, ensure a perfect electrical connection and superior shielding.

It meets all standards required to ensure total safety in electrical installations. Furthermore each component has passed tests carried out under extreme conditions.

Features improved design and materials, robustness, easy opening, smooth-turning lock, flexibility, maximum door opening (up to 120°), maximum working width for your assemblies, easily dismantable, unique features for great performance and highly polished surface.

**FOR MORE INFORMATION CLICK HERE**

## CHARACTERISTICS

- EMC joint EPDM conductive coated with Cu and Sn and 60 shore hardness.
- Electromagnetically protected.
- Delivery with protective film that prevents scratches and abrasions during handling.
- Compact design offering complete protection and resistance to impact.
- With a drainage channels which prevents liquid contact with the EPDM gasket and with concealed hinges.
- Delvalle can make any size to suit to your needs.
- Meets EMC, RFI and EMI standards.

## APPLICATIONS

Especially designed for telecommunications, railway signals, airtraffic signals, medical and military industries or where extra protection against electromagnetic interference is needed.

## OPTIONS

- With a choice of two doors (from 1200mm width).
- Plinths at base, metal legs, wall support, cable entry cover, castors and metal legs.
- Transparent polycarbonate door.
- Manufactured in stainless steel AISI 316L EN 14404.
- Mounting plate insulation (bakelite) or stainless steel.

# ELECTRIC WALL CABINET LUXOR EMC SERIES IP55

## NORMS

- Complies with 2014/30/UE and EMC Directive 2014/35/UE.
- To IP55 (IP55 two doors) Norm IEC EN62208 - EN 60529.
- Manufactured following EU low voltage ruling 2014/35/UE
- RoHs, EMC, RFI y EMI compliant.
- UL approval Nema 4x, 12, 3r, I (on request). N°File E342220.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

# JUNCTION STAINLESS STEEL BOX EMC GEO SERIES IP55

Examples

## Strength, Durability and Long Life

EMC Junction boxes, special body and door gasket (IP + EMC) providing both environmental protection and continuity between the door and body of the enclosure. EMC enclosures range provides a shielded alternative for Test Instrumentation, Industrial Controls & Electronic applications. These solutions are more suitable for military and hospital areas and chemical and food-processing industries. Main sources of electrical interference and equipment sensitive to it.

**FOR MORE INFORMATION CLICK HERE**

## ADVANTAGES

- Unlimited custom made options
- Supplied with protective film which prevents scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Up to IP55
- Strength, durability and long life
- Special built to measure solutions
- 100% stainless steel
- Wide variety of accessories
- Stainless steel AISI 304L or AISI 316L

## APPLICATIONS

Special body and door gasket (IP + EMC) providing both environmental protection and continuity between the door and body of the enclosure. Programmable controllers. Electronic circuits or boards. Regulators. Input signal cables (detectors, sensors, measurement probes).

## OPTIONS

- Custom made based on your needs.
- Manufactured in stainless steel AISI 316L - EN 14404.
- Finished in textured paint RAL on request.
- Mounting plate insulator (Bakelite) or painted steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.

# JUNCTION STAINLESS STEEL BOX EMC GEO SERIES IP55

## NORMS

- IP55 Norm IEC 60529.
- Maximum IK10 resistance Norm IEC 62262.
- Manufactured following EU low voltage ruling 2014/35/UE
- RoHS Directive 2011/65/UE compliant.
- Maximum voltage 1000V
- Temperature resistant: -40°C +100°C

# OUTDOOR RACK STORM EMC SERIES IP55

Examples

**Specially Designed  
for Urban and Interurban  
Areas, Roads or Highways**

Outdoor Storm Series enclosure, designed to be placed in urban or interurban areas, protecting the electronic equipment needed for lighting, signage and video surveillance. Its application range is extended with external telecommunication installations, telephones, computers, weather stations and any other application that needs extra protection. The Storm Series is characterized by its high resistance to corrosion and wear, ideal for placement in cities and highways, spacious interior; thanks to its construction, it achieves greater width and height than the rest. Provided with approved water repellent injected seals on exterior doors allowing for tightness and stabilising an ideal temperature for placement in areas of extreme temperature or hostile weather environments. Made of stainless steel AISI 304L (EN 14306) with polyester paint finish, and features a handle made of a material highly resistant to vandalism and forced openings. The interior design allows easy placement of racks, mounting plates or separators.

➔ [FOR MORE INFORMATION CLICK HERE](#)

# OUTDOOR RACK STORM EMC SERIES IP55

## APPLICATIONS

Our Storm Series, design, finishing and sealing make it ideal for outdoor use.

As its name suggests its placement is usually on roads, signalling or lighting, and use in weather stations, telecommunications, telephones, fibre optics and video surveillance in urban or interurban areas.

## CHARACTERISTICS

- Designs and pictures available on request.
- Plinths at base for enclosures of any size. They allow enclosures to stand over the floor, with extra room for cable entry. Available 100mm (standard) and 200mm high.
- Stainless steel AISI 316L, EN 1.4404.
- Ventilation KIT (Fan, resistance heating and dual thermostat)
- Graffiti-proof protective paint
- EMC version according to 2014/30/UE of electromagnetic compatibility.

## OPTIONS

- With a choice of two doors (from 1200mm width).
- Plinths at base, metal legs, wall support, cable entry cover, castors and metal legs.
- Transparent polycarbonate door.
- Manufactured in stainless steel AISI 316L EN 1.4404.
- Mounting plate insulation (bakelite) or stainless steel.

## NORMS

- IP55 Norm EN 62208 and EN 60529.
- Maximum IK10 resistance Norm IEC 62208 and EN 50102
- En 61969-3 Mechanical Structures for Electronic Equipment - outdoor enclosures -.
- IEC 60068-2-30 and IEC 60068-2-11
- Built to CE standards. 2014/35/UE UL Nema 4x, 12, 1, 3r by request. N°File E342220.
- Shock resistant against sharp objects EN 60439-5
- RoHs compliant.
- Maximum voltage 1000V
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

# OUTDOOR RACK **TORNADO EMC SERIES** IP55

Examples

## Large Space Inside for Rack Equipments

EMC enclosures with an EPDM conductive gasket between frame and contact surface, ensure a perfect electrical connection and superior shielding.

It meets all standards required to ensure total safety in electrical installations. Furthermore each component has passed tests carried out under extreme conditions.

Features improved design and materials, robustness, easy opening, smooth-turning lock, flexibility, maximum door opening (up to 120°),

maximum working width for your assemblies, easily dismantable, unique features for great performance and highly polished surface. We recommend plinths at base for cable entry in Tribeca.

Maintenance free for life over 30 years.

Specially designed for urban and interurban areas, roads or highways.

Especially designed for telecommunications, railway signals, air traffic signals, medical and military industries or where extra protection against electromagnetic interference is needed. Very good mechanical properties and high resistance to shape distortion, with water repellent injected seal.

Delvalle can adapt this design to the measurements required by the client, retaining the fundamentals of insulation, sealing and safety.

Strength, durability and long life. High resistance to vandalism.

# OUTDOOR RACK **TORNADO EMC SERIES** IP55

## APPLICATIONS

Especially designed for telecommunications, railway signals, air traffic signals, medical and military industries or where extra protection against electromagnetic interference is needed.

Outdoor placement:

- Areas with extreme temperatures or harsh environments
- Arid tropics, high mountain.

## ADVANTAGES

- Very good mechanical properties and high resistance to shape distortion.
- With water repellent injected seal.
- Door retained with stoppers.
- The enclosure includes anti-vandalism locks and handles suitable for semi-cylindrical profile locks.
- Maintenance free for life over 30 years.
- Delvalle can adapt this design to the measurements required by the client, retaining the fundamentals of insulation, sealing and safety.
- Strength, durability and long life.
- High resistance to vandalism.
- Specially designed for urban and interurban areas, roads or highways.
- High resistance to corrosion and wear.
- Large space inside for Rack equipments.
- Two versions: galvanized steel and painted galvanized steel.

## MATERIALS

- Aluminium Outdoor Rack: Improves cooling and is lighter (2 mm).
- Galvanized Outdoor Rack: a cheaper alternative.
- Stainless Steel Outdoor Rack: consult details and prices.

## OPTIONS

- Delvalle can design a specific solution to the client's requirements while retaining the fundamentals of thermal insulation, sealing, safety and easy installation.
- 19" or 21", depending on rack support position.
- Ventilation KIT: fan, dual thermostat and resistance heater.
- Several options in roof ventilation.
- 200 mm plinth at base.
- Possibility of including air conditioning equipment attached to one side or the roof.
- Can also be supplied without a frame rack but with trays.
- Handle with locking system.
- Available with 1 or 2 doors.
- Full range of accessories available.
- Degree of protection: up to IP55.
- The tray can include micro cuts for later placement of different options.

## FEATURES EMC

- EMC joint EPDM conductive coated with Cu and Sn and 60 shore hardness
- Electromagnetically protected.
- Delivery with protective film that prevents scratches and abrasions during handling.
- Compact design offering complete protection and resistance to impact.
- With a drainage channels which prevents liquid contact with the EPDM gasket and with concealed hinges.
- Delvalle can make any size to suit to your needs.
- Meets EMC, RFI and EMI standards

# FILTER FAN EMC SERIES

IP55

Examples

Examples stainless steel version

## EMC fan with Fitted Filter and EMC Conductive Gasket

EMC fan with fitted filter and EMC conductive gasket.

High performance, low power, and silent working, with a slim design, only 4 mm, and an affordable price. These fans are ideal for the removal of large heat loads inside the cabinets economically and easily.

Its compact design, easy mounting and dismounting for quick cleaning make it ideal for use in any heat dissipation from inside the enclosure. Quick assembly thanks to the fast "Clip-on" mounting with self-adhesive gasket.

➔ [FOR MORE INFORMATION CLICK HERE](#)

## CHARACTERISTICS

- With EMC conductive gasket
- Life time +50.000 hours in 40°C
- ECOfriendly: low consumption, high efficiency and very silent.
- Fast "Clip-on" mounting
- "Inside-out" air flow
- Ball bearing
- Maximum reliable and efficient engine
- Extrathick panels (1.2 - 2.4 mm)
- Operating temperature -10 /+70°C
- 100% work cycle.
- The fan is supplied with a high resistant filter designed for easy cleaning.
- Also available in stainless steel.

## APPLICATIONS

Especially designed for telecommunications, railway signals, airtraffic signals, medical and military industries or where needing extra protection against electromagnetic interference or requiring a high level of protection IP55.

## NORMS

- Complies with 2014/30/UE and EMC Directive 2014/35/UE.
- IP55/Class I Norm IEC 60529.
- Built under directive 2014/35/UE low voltage.
- Operating temperature -10°C +70°C.
- Filter mat (Eurovent) EU2 and EU3 (depending on model).
- Material ABS UL94V-O. Colour Ral 7035.
- Working life over 50.000 hours at 40°C.

## METRIC EMC STAINLESS STEEL AISI 304 AND NICKEL PLATED CABLE GLANDS IP55

Modern technologies and modern products are becoming more and more efficient and complex. The demands on general safety and functional reliability are constantly increasing. More electromagnetic interlinks are taking place as a result of the rising number of electronic appliances. As a result, the "EMC Law" was passed. Since 01.01.1996 there is an EU Directive of

Electromagnetic Compatibility 2014/30/UE. In the EMC directive, the following objectives are agreed upon:

- A harmonised and acceptable level of protection
- Electronic devices must not disturb one another
- Devices must have their own adequate level of intrinsic immunity to electromagnetic disturbances.

- Material: Stainless steel AISI 304 / Nickel plated
- Thread: Metric
- Sealing ring: NBR
- Stainless steel lock nut included
- Ultraviolet (UV) resistance
- Protection: IP55 - 5 bar
- Certificates: CE, ROHS, REACH
- Temperature resistance:
  - -40°C to +100°C
