WE PUT AT YOUR DISPOSAL

We offer over **50 years** providing solutions to demanding customers who require very specific characteristics and behaviour according to the sector and their needs.

WHEREVER YOU GO

We are committed to working closely with our customers, providing them with **exceptional service** and offering an advanced and extensive range of products with very competitive prices.

HIGH STANDARD OF QUALITY AND SERVICES

We only use materials provided by companies who offer the very **highest quality**, suitable and certified products. Our success is due to top quality assurance: ISO 9001, SGS, UL, TÜV, ISO 14000 and ISO45001.

CUSTOMIZE TOTALLY YOUR ENCLOSURE

Our production systems can give custom-made solutions **on demand**. Every colour from RAL chart is available to be personalized. A variety of protection standards thanks to our own painting facilities.

100%

Diseñado y fabricado íntegramente en España

ELECTRICAL BOXES AND ENCLOSURES ISO 20653 - IP6K9K

We manufacturer custom made heavy duty waterproof electrical enclosures IP6K9K by standard ISO 20653

The first digit indicates the level of protection that the enclosure provides against access to hazardous parts (e.g., electrical conductors, moving parts) and the ingress of solid foreign objects. The second digit indicates the level of protection that the enclosure provides against harmful ingress of water.

SOLID PARTICLE PROTECTION		LIQUID INGRESS PROTECTION	
IP	DESCRIPTION	IP	DESCRIPTION
0	No protection against contact and ingress of objects	0	No protection against water
1	Any large surface of the body, such as the back of a hand, but no protection against deliberate contact with a body part	1	Dripping water (vertically falling drops) shall have no harmful effect on the specimen when mounted in an upright position onto a turntable and rotated at 1 RPM
2	Protected against solid objects over 12.5mm e.g. hands, large tools	2	Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle of 15° from its normal position. A total of four positions are tested within two axes
3	Protected against solid objects over 2.5mm e.g. wire, small tool	3	Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect, utilizing either: a) an oscillating fixture, or b) A spray nozzle with a counterbalanced shield. Test a) is conducted for 5 minutes, then repeated with the specimen rotated horizontally by 90° for the second 5-minute test. Test b) is conducted (with shield in place) for 5 minutes minimum
4	Protected against solid objects over 1.0mm e.g. wires	4	Water splashing against the enclosure from any direction shall have no harmful effect, utilizing either: a) an oscillating fixture, or b) A spray nozzle with no shield. Test a) is conducted for 10 minutes. Test b) is conducted (without shield) for 5 minutes minimum
5	Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to interfere with the satisfactory operation of the equipment	5	Water projected by a nozzle (6.3 mm) against enclosure from any direction shall have no harmful effects
6	No ingress of dust; complete protection against contact (dust tight). A vacuum must be applied. Test duration of up to 8 hours based on air flow	6	Water projected in powerful jets (12.5 mm nozzle) against the enclosure from any direction shall have no harmful effects
		7	Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion)
		8	The protection allows this equipment to be immersion in to 1 meters of water without ingress during 7 days
		9K	Powerful high temperature water jets (80°C)

The IP Code, International Protection Marking, IEC standard 60529, sometimes interpreted as Ingress Protection Marking, classifies and rates the degree of protection provided against intrusion (body parts such as hands and fingers), dust, accidental contact, and water by mechanical casings and electrical enclosures. It is published by the International Electrotechnical Commission (IEC). The equivalent European standard is EN 60529.

The IP6K9K rating is for applications where high pressure and high temperature washdown is used to sanitize equipment. The IP6K9K test specification was initially developed for those that need regular intensive cleaning in the Food & Beverage.

These products comply with the following regulations:

- ISO 20653 - IP6K9K, DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- DIN EN 1672-2:2006 for food industry machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc. I.3 machinery for open processes.

FRESH DESIGN ENCLOSURES & BOXES

- Especially designed and officially approved for food, chemical, pharmaceutical,...
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance. Water channel to prevent liquids coming into contact with the polyurethane seal and hidden hinges giving perfect sealing.
- Moreover the inclination of the roof prevents objects being placed on the surface and our vertical electro polished finish helps repel liquids and prevent virus and bacteria building up on the surface.
- IP6K9K resistant powerful high temperature water jets (80°C).
- Delvalle supplies any measurements required.
- Option painted galvanized steel finish in RAL 7035 or another color.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

Example

Specially Designed for Placing Push-Buttons

Fresh Geo Series IP6K9K push-button and junction boxes, elegant watertight boxes made wholly in finely polished AISI 304L EN-14306 stainless steel available in plain or bored covers (22.5).
Specially designed for placing push-buttons.

[FOR MORE INFORMATION CLICK HERE](#)

ADVANTAGES

- Unlimited options.
- Supplied with protective film which prevents scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance.
- Water channel to prevent liquids coming into contact with the polyurethane seal and hidden hinges giving perfect sealing.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Temperature resistant: -40°C + 100°C (short time + 160°C).
- Option silicone gasket: from -60°C to $+180^{\circ}\text{C}$ (short time up to $+350^{\circ}\text{C}$).
- Up to IP6K9K.

APPLICATIONS

Especially designed and officially approved for food, chemical, pharmaceutical, transformer and telecommunication industries for use both inside and outside, due to the advantages of high resistance to chemical agents and durability.

OPTIONS

- Custom made based on your needs.
- Manufactured in stainless steel AISI 316L EN 14404.
- Metal legs.
- Unloosable screws.
- Transparent polycarbonate door or with tempered glass (no IP6K9K).
- Finished in textured paint RAL on request.
- Mounting plate insulator (bakelite) or painted steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

JUNCTION BOX FRESH GEO SERIES IP6K9K

NORMATIVE

- IP66 Norm IEC 60529 (IP67 on request).
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62262.
- Manufactured following EU low voltage ruling 2014/35/UE.
- RoHS Directive 2011/65/UE compliant.
- UL approval Nema 4x, 12, 3r, 1. N° File E342220.
- Maximum voltage 1000 V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

Example

Special Enclosure for Food Industry IP6K9K

Electrical Fresh Tribeca Series IP6K9K enclosure with a large capacity, specially designed for the food industry.

No openings, hinges, where bacteria could lie. Easy opening by rotating handle and four point lock, easy placement on the floor; flexible, maximum working width.

Moreover the inclination of the roof prevents objects being placed on the surface and our vertical electro polished finish helps repel liquids and prevent virus and bacteria building up on the surface.

[→ FOR MORE INFORMATION CLICK HERE](#)

APPLICATIONS

Especially designed for the food industry and sterile rooms, wineries, dairies and take away food outlets or any other place where cleanliness is essential as well as total absence of dust, dirt and bacteria.

NORMATIVE

- IP66 (IP55 two doors) by request. Norm IEC 60529.
- ISO 20653 - IP6K9K.
- Maximum IK10 resistance Norm IEC 62262.
- EC 1935/2004 rule compliant for materials intended to come into contact with food.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC (previously 89/37/EC) Food machinery and cosmetic or pharmaceutic production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Manufactured following EU low voltage ruling 2014/35/UE.
- Compliant RoHS Directive.
- UL approval Nema 4x, 12, 3r, 1. N° File E342220.
- Maximum voltage 1000V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

OPTIONS

- Custom made based on your needs.
- With a choice of two doors (from 1200 mm width).
- Plinths at base. Castors. Metal legs.
- Clear polycarbonate door or transparent safety glass door (no IP6K9K).
- Manufactured in stainless steel AISI 316L EN 14404.
- Mounting plate insulator (bakelite) or stainless steel.
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

ADVANTAGES

- Supplied wrapped in protective film which prevents scratches and abrasions during handling.
- The monobloc manufacture gives total sealing and maximum resistance.
- No openings where bacteria could lie.
- With electro-polished finish that helps to slide the liquid and waterproof seal that prevents dirt and bacteria deposits.
- 100% stainless steel, from handle to opening system.
- 120° door opening. Standard opening to the left. Specify if you need opening to the right.
- Standard electrical panel and handle lock with four locking points and concealed stainless steel hinges.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Distributed load 600 Kg.

Monobloc Manufacture IP6K9K Gives Total Sealing and Maximum Resistance

Electrical hygienic enclosure Fresh Series IP6K9K, specially designed for the food industry.

No openings, hinges, where bacteria could lie but robust and easy lock opening with a big space inside to allow easy working.

Moreover the inclination of the roof prevents objects being placed on the surface and our vertical electro polished finish helps repel liquids and prevent virus and bacteria building up on the surface.

[FOR MORE INFORMATION CLICK HERE](#)

APPLICATIONS

Especially designed for the food industry and sterile rooms, wineries, dairies and take away food outlets or any other place where cleanliness is essential as well as total absence of dust, dirt and bacteria.

ADVANTAGES

- Supplied wrapped in protective film which prevents scratches and abrasions during handling.
- The monobloc manufacture gives total sealing and maximum resistance.
- No openings where bacteria could lie.
- 120° door opening. Standard opening to the left. Specify if you need opening to the right.
- With electro-polished finish that helps dispel liquids and waterproof seal that prevents dirt and bacteria deposits.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.

OPTIONS

- Custom made based on your needs.
- Also made with two doors (from 800x600).
- Plinths at base. Metal legs.
- Transparent polycarbonate door (no IP6K9K).
- Manufactured in stainless steel AISI 316L.
- Mounting plate insulator (bakelite) or sst.
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

NORMATIVE

- IP66 Norm IEC 60529.
- ISO 20653 - IP6K9K.
- Maximum IK10 resistance Norm IEC 62262.
- EC 1935/2004 rule compliant for materials intended to come into contact with food.
- DIN EN ISO 14159 Machine safety – Hygienic requirements pertaining to the design of machinery.
- DIN EN 1672-2:2006 for food industry machinery.
- Follows EU low voltage ruling 2014/35/UE.
- RoHS Directive 2011/65/UE compliant.

HYGIENIC DESIGN ENCLOSURES & BOXES

- Especially designed and officially approved for food, chemical, pharmaceutical,...
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance. Water channel to prevent liquids coming into contact with the polyurethane seal and hidden hinges giving perfect sealing.
- Moreover the inclination of the roof prevents objects being placed on the surface and our vertical electro polished finish helps repel liquids and prevent virus and bacteria building up on the surface.
- IP6K9K resistant powerful high temperature water jets (80°C).
- Delvalle supplies any measurements required.
- Option painted galvanized steel finish in RAL 7035 or another color.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Silicone blue gasket: from -60°C to +200°C (short time up to +350°C) and special anti-bacteria closures.

WITH SILICONE GASKET

Example

Monobloc Manufacture IP6K9K Gives Total Sealing and Maximum Resistance

Hygienic Design Luxor electrical enclosure IP6K9K wall made of stainless steel AISI 304L or AISI 316L. Specially designed for the food industry. No openings, hinges, where bacteria could lie but robust and easy lock opening with a big space inside to allow easy working. Moreover the inclination of the roof prevents objects being placed on the surface and our vertical electro polished finish helps repel liquids and prevent virus and bacteria building up on the surface.

➔ [FOR MORE INFORMATION CLICK HERE](#)

APPLICATIONS

Especially designed for the food industry and sterile rooms, wineries, dairies and take away food outlets or any other place where cleanliness is essential as well as total absence of dust, dirt and bacteria.

ADVANTAGES

- Supplied wrapped in protective film which prevents scratches and abrasions during handling.
- Resistant seal to temperatures from -60°C up to +200°C.
- The monobloc manufacture gives total sealing and maximum resistance.
- No openings where bacteria could lie.
- 90° door opening. Standard opening to the left. Specify if you need opening to the right.
- With electro-polished finish that helps dispel liquids and waterproof seal that prevents dirt and bacteria deposits.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).
- Captives screws.

OPTIONS

- Custom made based on your needs.
- Also made with two doors (from 800x600).
- Plinths at base and metal legs.
- Transparent polycarbonate door (no IP6K9K).
- Manufactured in stainless steel AISI 316L.
- Mounting plate insulator (bakelite) or sst.
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

NORMATIVE

- IP66 Norm IEC 60529.
- ISO 20653 - IP6K9K.
- Maximum IK10 resistance Norm IEC 62262.
- EC 1935/2004 rule compliant for materials intended to come into contact with food.
- DIN EN ISO 14159 Machine safety – Hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC (previously 89/37/EC) Food machinery and cosmetic or pharmaceutic production.
- EHEDG Guideline Hygienic Design doc. I 3 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Follows EU low voltage ruling 2014/35/UE.
- RoHS Directive 2011/65/UE compliant.
- UL approval Nema 4x, 12, 3r, I. N° File E342220.
- Maximum voltage 1000V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

Strength, Durability and Long Life IP6K9K

Hygienic Geo Series IP6K9K push-button and junction boxes, elegant watertight boxes made wholly in finely polished AISI 304L EN-14306 stainless steel available in plain or bored covers (22.5). Specially designed for placing push-buttons.

[FOR MORE INFORMATION CLICK HERE](#)

ADVANTAGES

- Supplied with protective film which prevents scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance.
- Water channel to prevent liquids coming into contact with the polyurethane seal and hidden hinges giving perfect sealing.
- Resistant seal to temperatures from -60°C up to +200°C.
- Captives screws.
- Finished in textured paint RAL on request.

APPLICATIONS

Especially designed and officially approved for food, chemical, pharmaceutical, transformer and telecommunication industries for use both inside and outside, due to the advantages of high resistance to chemical agents and durability.

OPTIONS

- Custom made based on your needs.
- Manufactured in stainless steel AISI 316L EN 14404.
- Metal legs, unloosable screws.
- Transparent polycarbonate door or with tempered glass (no IP6K9K).
- Mounting plate insulator (bakelite) or painted steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

NORMATIVE

- IP66 Norm IEC 60529 (IP67 on request).
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- Maximum IK10 resistance Norm IEC 62262.
- DIN EN 1672-2:2006 for food industry machinery.
- Manufactured following EU low voltage ruling 2014/35/UE
- RoHS Directive 2011/65/UE compliant.
- UL approval Nema 4x, 12, 3r, I. N° File E342220.
- Maximum voltage 1000V
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

APPLICATIONS

Especially designed for the food industry and sterile rooms, wineries, dairies and take away food outlets or any other place where cleanliness is essential as well as total absence of dust, dirt and bacteria.

ADVANTAGES

- Supplied wrapped in protective film which prevents scratches and abrasions during handling.
- Resistant seal to temperatures from -60°C up to +200°C.
- The monobloc manufacture gives total sealing and maximum resistance.
- No openings where bacteria could lie.
- With electro-polished finish that helps to slide the liquid and waterproof seal that prevents dirt and bacteria deposits.
- 100% stainless steel from handle to opening system. 120° door opening. Standard opening to the left.
- Specify if you need opening to the right.
- Standard electrical panel and handle lock with four locking points and concealed stainless steel hinges.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Distributed load 600 Kg.
- Captives screws.

OPTIONS

- Custom made based on your needs.
- With a choice of two doors (from 1200 mm width).
- Plinths at base. Castors. Metal legs.
- Clear polycarbonate door or transparent safety glass door (no IP6K9K).
- Manufactured in stainless steel AISI 316L. EN 14404.
- Mounting plate insulator (bakelite) or stainless steel.
- We have hygienic glands on request.
- Option painted galvanized steel finish in RAL 7035 or another color.

NORMATIVE

- IP66 (IP55 two doors) by request. Norm IEC 60529.
- ISO 20653 - IP6K9K.
- Maximum IK10 resistance Norm IEC 62262.
- EC 1935/2004 rule compliant for materials intended to come into contact with food.

STAINLESS STEEL ENCLOSURES & CABLE GLANDS

- Electrical control panel approved for food, chemical and pharmaceutical industries, processing plants, telecommunication centers and outdoor use because of its high durability and chemical product resistance.
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance.
- IP6K9K resistant powerful high temperature water jets (80°C).
- Delvalle supplies any measurements required.
- Option painted galvanized steel finish in RAL 7035 or another color.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

STAINLESS STEEL WALL MOUNTED ENCLOSURES

LUXOR SERIES IP6K9K

Example

Maximum Working Width for your Assemblies IP6K9K

Electrical enclosures Luxor Series IP6K9K with improved design and materials used of locks, easy to open, smoothly turning and opening, flexibility, maximum opening of the doors (up to 120 °), maximum working width for your assemblies, easily removable, unique performance with cutting-edge polished surface finish.

All tests necessary to ensure safety in their electrical installations. Furthermore, each component has exceeded several tests under extreme conditions guaranteeing a long life in electrical assembly.

[FOR MORE INFORMATION CLICK HERE](#)

Available opening with 3-locking point handle

APPLICATIONS

- Specially designed for automatic meter positioning, machine controls, and offering, where necessary, a smart look, high quality and durability.
- Electrical control panel approved for food, chemical and pharmaceutical industries, processing plants, telecommunication centers and outdoor use because of its high durability and chemical product resistance.

ADVANTAGES

- Supplied protective film wrapped to prevent scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc gives 100% sealing and maximum resistance.
- With flushing channel that avoids any contact with liquids, polyurethane joints and hidden hinges.
- The standard control panel comes with stainless steel double-bit locking handles.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.

OPTIONS

- Custom made based on your needs.
- Option painted galvanized steel finish in RAL 7035 or another color. Possibility of two doors (from 800x600).
- 170° hinge that allows maximum opening for easy access to the cabinet without removing the door.
- Plinths at base. Metal legs.
- Option painted galvanized steel finish in RAL 7035 or another color.
- Wall support (not included in the standard model).
- Transparent polycarbonate door or transparent safety glass door (no IP6K9K).
- Manufactured in stainless steel AISI 316L EN 14404.
- Mounting plate insulation (bakelite) or stainless steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- Available opening with 3-locking point handle.

STAINLESS STEEL WALL MOUNTED ENCLOSURES LUXOR SERIES IP6K9K

NORMS

- IP66 (IP55 double door without mounting, IP66 with central welded bar mounting) Norm IEC EN 62208 and EN 60529.
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62208 and IEC 62262.
- Maximum voltage 1000V.
- Manufactured following EU low voltage ruling 2014/35/UE.
- Materials intended to come into contact with food EC 1935/2004.
- RoHs compliant.
- UL approval Nema 4x, 12, 3r y l (by request). N° File E342220.

STAINLESS STEEL FREE-STANDING ENCLOSURE

TRIBECA SERIES IP6K9K

Example

**Maximum Working Width
for your Assemblies IP6K9K**

Tribeca Series IP6K9K compact enclosures with improved design, robust, easy opening by rotating handle and four point lock, easy placement on the floor; flexible, maximum working width and a unique design in stainless steel AISI 304L. Available in one or two doors, 120° swivel, easily removable. We recommend cable entry hollow base.

➔ [FOR MORE INFORMATION CLICK HERE](#)

APPLICATIONS

- Especially designed for automatic positioning, machine control meters and where smartness, quality and durability are necessary.
- Electrical control panel approved for food, chemical, pharmaceutical processing centres, telecommunications and outdoor use because of its advantages of durability and chemical resistance.

NORMATIVE

- To IP66 (IP66 two doors) Norm IEC 60529.
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62262.
- Manufactured following EU low voltage ruling 2014/35/UE.
- Materials intended to come into contact with food EC 1935/2004.
- RoHs compliant.
- UL approval Nema 4x, 12, 3r, 1. N° File E342220.
- Maximum voltage 1000V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

OPTIONS

- Custom made based on your needs.
- With a choice of two doors (from 1200mm width).
- Plinths at base.
- Castors.
- Metal legs.
- Clear polycarbonate door or transparent safety glass door (no IP6K9K).
- Manufactured in stainless steel AISI 316L EN 14404.
- Mounting plate insulator (bakelite) or stainless steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- Option painted galvanized steel finish in RAL 7035 or another color.

FEATURES

- Supplied with protective film to prevent scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc allows sealing and maximum resistance.
- A drainage channel prevents liquid contact with the polyurethane gasket and with concealed hinges.
- 100% Stainless Steel, from handle to opening system.
- Standard electrical panel with handle lock (four locking points) and concealed stainless steel hinges.
- Delvalle made to order in any size to suit your needs and all drilling holes, both for the door and the enclosure included.
- Distributed load 600 kg.

TITAN SERIES

IP6K9K

Example

**Perfect Sealing Thanks
to Gaskets Used
in the Joints IP6K9K**

Modular stainless steel enclosure Titan Series IP6K9K, stylish and corrosion resistant, completely adaptable, flexible, for food, petrochemical, pharmaceutical industries, electrical use, which require smartness hygiene, sealing and long life.

Our system is a closed profile in stainless steel steel, welded, give greater strength and top quality. The doors sides and rear are hinged and easily removable with 120° opening, thanks to assembly with screws.

All this is achieved with a perfect assembly system where after the construction requested modules are coupled with screws. But the best advantage of this cabinet is the versatility it provides, in Addition to the large number of customized accessories.

A perfect assembly system that gives the most consistent cabinet and facilitates the assembly of other components, along with an elegant finish make this the Titan stainless steel, one of the most popular enclosures.

FOR MORE INFORMATION CLICK HERE

APPLICATIONS

Especially designed for maximum flexibility in use. Thanks to its versatility it can be used in the food and pharmaceuticals industries, where hygiene is essential, as in petrochemical, electrical, industries where total sealing is essential and also in general industrial environments always offering a long life.

NORMATIVE

- IP66 Norm EN 62208 / EN 60529.
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc. I 3 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62208 and EN 50102.
- Manufactured following EU low voltage ruling 2014/35/UE.
- RoHS Directive 2011/65/UE compliant.
- UL approval Nema 4x, 12, 3r, 1. N° File E342220.
- Maximum voltage 1000 V.
- Temperature resistant: -40°C + 100°C (short time + 160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C)

OPTIONS

- Custom made based on your needs.
- With the possibility to join several modules.
- Plinths at base. Swing rack.
- Eyebolt (not included in standard model).
- All types of ventilation.
- Cable entry cover at base.
- Metal legs and wheels.
- Transparent polycarbonate door; with tempered glass or with safety glass (no IP6K9K).
- Finished in textured paint RAL on request.
- Mounting plate insulator (bakelite) or painted steel.
- Manufactured in stainless steel AISI 316L.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- Option painted galvanized steel finish in RAL 7035 or another color.

ADVANTAGES

- Broad assembly area and great accessibility.
- Endless choices, modules and measurements.
- Delivery soldier, which gives it great strength.
- Side rear, top and bottom panels, easily removable.
- 100% stainless steel from handle to opening system.
- Door opens to 120°.
- Standard with three or four width points lock.
- Perfect sealing thanks to gaskets used in the joints.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Distributed load 1000 kg.

PUSH-BUTTON AND JUNCTION STAINLESS STEEL BOX

GEO SERIES IP6K9K

Examples

**Strength, Durability
and Long Life IP6K9K**

Geo Series IP6K9K push-button and junction boxes, elegant watertight boxes made wholly in finely polished AISI 304L EN-14306 stainless steel available in plain or bored covers (22.5). Specially designed for placing push-buttons.

➔ [FOR MORE INFORMATION CLICK HERE](#)

APPLICATIONS

Especially designed and officially approved for food, chemical, pharmaceutical, transformer and telecommunication industries for use both inside and outside, due to the advantages of high resistance to chemical agents and durability.

NORMATIVE

- IP66 Norm IEC 60529 (IP67 on request).
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62262.
- Manufactured following EU low voltage ruling 2014/35/UE
- RoHS Directive 2011/65/UE compliant.
- UL approval Nema 4x, 12, 3r, 1. N° File E342220.
- Maximum voltage 1000V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

OPTIONS

- Custom made based on your needs.
- Manufactured in stainless steel AISI 316L EN 14404.
- Metal legs.
- Unloosable screws.
- Finished in textured paint RAL on request.
- Mounting plate insulator (bakelite) or painted steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- Option painted galvanized steel finish in RAL 7035 or another color.

ADVANTAGES

- Strength, durability and long life.
- Special built to measure solutions.
- 100% stainless steel.
- Wide variety of accessories.
- Stainless steel AISI 304L or AISI 316L.
- Unlimited options.
- Supplied with protective film which prevents scratches and abrasions during handling.
- The manufacture of the stainless steel monobloc allows sealing and ensures maximum resistance.
- Water channel to prevent liquids coming into contact with the polyurethane seal and hidden hinges giving perfect sealing.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Up to IP6K9K.

Examples

Strength and Durability IP6K9K

Riviera Console Series IP6K9K, elegant, functional consoles manufactured in finely polished AISI 304L, EN14306 stainless steel, easily accessed, with a design which allows for IP55 protection in two doors and IP66 for one door maximum resistance of IK10.

Top door with shock absorbers which make opening easier, with dismountable bottom and hidden hinges throughout. It comes with a galvanized mounting plate. Its drainage channels ensure liquids don't come into contact with the polyurethane joint sealings. Front door opening to 130° making easy access.

STAINLESS STEEL CONSOLE RIVIERA SERIES IP6K9K

APPLICATIONS

Officially approved for food, chemical, pharmaceutical, transformer and telecommunication industries for use both inside and outside, due to its advantages of high resistance to chemical agents and its durability.

NORMATIVE

- From IP55 to IP66 Norm IEC EN 62208 EN 60529.
- ISO 20653 - IP6K9K.
- DIN EN ISO 14159 Machine safety – hygiene requirements pertaining to the design of machinery.
- Machinery Directive 2006/42/EC. Food machinery and cosmetic or pharmaceutical production.
- EHEDG Guideline Hygienic Design doc.13 machinery for open processes.
- DIN EN 1672-2:2006 for food industry machinery.
- Maximum IK10 resistance Norm IEC 62208 and EN 50102.
- Our electrical panels are built to CE standards 2014/35/UE.
- Comply with rules on materials intended to come into contact with food EC 1935/2004.
- RoHs compliant.
- Maximum voltage 1000V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).

OPTIONS

- Custom made based on your needs.
- Plinths/base.
- All types of ventilation and temperature control.
- Cable entry cover in front door.
- Metal leg or wheels.
- Transparent polycarbonate or tempered glass door (no IP6K9K).
- Manufactured in stainless steel AISI 316L.
- Mounting plate insulator (bakelite) or stainless steel.
- EMC version according to 2014/30/UE of electromagnetic compatibility.
- Option painted galvanized steel finish in RAL 7035 or another color.

ADVANTAGES

- Spacious assembly area giving great accessibility.
- Great external strength.
- Door opens to 130°.
- Standard quarter-turn double bit fasteners.
- Perfect sealing thanks to gaskets used in the joints.
- Great versatility, enables its use in almost any eld.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Wide variety of accessories.
- Top door with shock absorbers.
- Front door opens to 130°.
- Total accessibility.
- Stainless steel AISI 304L or AISI 316L.

METRIC STAINLESS STEEL CABLE GLANDS **HYGIENIC SERIES** IP69K

Hygienic glands are fit for passing, pressing and fixing cables between two compartments such as junction boxes, electric enclosures or any cabinet where protection against dust, dirt or water is required.

Made in stainless steel, hygienic glands are a definite solution against dirt and germs. They are the only glands tested according to FDA and EHEDG standards. We have the widest range from M12 to M25 and the highest quality.

- Material: Stainless steel AISI303L (other materials on request)
- Thread: TPE according to FDA guideline 21 CFR 177.2600 (PG and NPT upon request)
- Protection:
 - IP68 (5 bar, 30 min) according EN 60529
 - IP69K extend IEC 60529
- Temperature resistance:
 - -20°C to +100°C
 - -40°C to +150°C short time
- Applications: manufacturing food, clean room technology, biotechnology and chemical industry
- Benefits
 - Smooth finish prevents harmful microorganisms sticking to the surface
 - No threads are exposed. Cleaning of cable glands is easier, faster and less expensive compared to traditional stainless steel cable glands
 - Reliable strain relief due to strain relief element separated from grommet
 - Suitable for high pressure steam cleaning

CUSTOMIZED ENCLOSURE SOLUTIONS DELVALLE

Delvalle has more than 45 years of experience using the latest technology to implement and obtain the most innovative products on offer to all our customers. Delvalle is an ideal partner, combining an advanced and wide range of products at very competitive prices.

The customized manufacture of all electrical enclosures and cabinets Delvallebox is carry out with the most advanced technical methods and with the precision and consciousness of a craftsman. This makes the difference from competitors and is the best way to gain our customers' trust.

In Delvallebox we bear in mind that customers perceive the quality very clearly. In every product (for instance, in the cabinets here presented) safety and useful solutions are what customers value most.

Delvalle has tested all sizes and dimensions of waterproof enclosures according to EN 60529:2018. All weather resistant enclosures are more than simply rainproof, they meet a minimum of Nema 4X and IP66, IP67, IP68 and IP69k requirements to ensure your electronics are protected. From Junction boxes to industrial enclosures, Delvalle weatherproof enclosures offer a wide range of sizes and styles to keep your project waterproof.
