TEMPERATURE AND HUMIDITY SMART SENSOR

Example

Is Suitable for Installation Inside and Outside the Enclosure

The temperature and humidity compact smart sensor Delvalle electronically records temperature and humidity and converts the measured data into a standardized analog 4-20 mA or a digital IO-Link signal. The converted value signals can be utilized or further processed by a control or monitoring unit. The smart sensor is suitable for installation inside and outside the enclosure, even in harsh environmental conditions as can be found in the wind power industry: in shielded outdoor areas and exposed to vibrations.
