STAINLESS STEEL SEISMIC LUXOR ENCLOSURE SEISCORE SERIES

IP66

WE PUT AT YOUR DISPOSAL

We offer over **45 years** providing solutions to demanding customers who require very specific characteristics and behaviour according to the sector and their needs.

HIGH STANDARD OF QUALITY AND SERVICES

We only use materials provided by companies who offer the very **highest quality**, suitable and certified products. Our success is due to top quality assurance: ISO 9001, SGS, UL, TÜV, ISO 14000 and Ohsas 18001.

WHEREVER YOU GO

We are committed to working closely with our customers, providing them with **exceptional service** and offering an advanced and extensive range of products with very competitive prices.

CUSTOMIZE TOTALLY YOUR ENCLOSURE

Our production systems can give custom-made solutions **on demand**. Every colour from RAL chart is available to be personalized. A variety of protection standards thanks to our own painting facilities.

STAINLESS STEEL SEISMIC LUXOR ENCLOSURE SEISCORE SERIES

IP66

Examples

More Resistance Tanks to Structural Reinforcement for Maximum Durability

Seismic reinforced enclosure, single or double door; manufactured in stainless steel AISI 304L, EN 1.4306 finely polished, to IP55 or IP66.

The design with structural reinforcements and special hinges on high resistance doors, allows our reinforced electrical cabinets to resist large weights both on the structure and on the doors, whilst also housing heavy elements inside.

The seismic cabinets have been vigorously tested and have withstood tests for the strongest seismic activity, offering the customer high level protection in areas where seismic activity is a possibility. They can be installed outdoors, with vandal proof duraluminium lever lock. The seismic cabinet is provided with exterior plastic protection which prevents scratches when handling and positioning the automats inside the cabinet. This cover can be easily removed at the customer's premises. Optionally rack mountable panel.

APPLICATIONS

Specially designed for areas where they will be subject to constant vibration or high seismic stress.

STAINLESS STEEL SEISMIC LUXOR ENCLOSURE

SEISCORE SERIES

IP66

ADVANTAGES

- Broad assembly area with great accessibility.
- Great strength as a whole.
- Door opens to 120°, standard door opening to the left specify for a right side.
- Standard with toggle clasp made of stainless steel.
- Great versatility, so it can be applied to almost any field.
- Delvalle supplies any measurements required including custom built holes and cut outs both for the door and enclosure.
- Distributed load 1000 kg.

OPTIONS

- Earthquake-resistant design, seismic testing under standar UNE EN 60068-3-3.
- Up to IP69K -DIN 40050-9.
- Special individual solutions.
- More resistance tanks to structural reinforcement for maximum durability.
- Stainless steel AISI 316L.
- Painted steel.
- Broad assembly area with great accessibility.
- Great strength as a whole.
- Standard with toggle clasp made of stainless steel.

NORMATIVE

- IP66 (W) Norm IEC EN 62208 EN 60529.
- Maximum IK10 resistance Norm IEC 62208 and EN 50102
- Our electrical panels are built to CE standards 2014/35/UE.
- Seismic qualification specification certificates 8484-CE-005-E.
- Norm IEEE-344, Institute of American electrical and electronic Engineers. RoHs compliant.
- UL approval Nema 4x, 12, 3r, I. N° File E342220.
- Norm UNE EN 60068-3-3 Environment at and seismic testing methods.
- Maximum voltage 1000 V.
- Temperature resistant: -40°C +100°C (short time +160°C).
- Option silicone gasket: from -60°C to +180°C (short time up to +350°C).
- Regulations Board of the Nuclear Security.

SEISMIC NORMATIVE

- NEBS GR-63-CORE
- United States (ASCE 7)
- European (EN 1998 - Eurocode 8)
